## A systematic review on the functional testing of semantic web services

Abbas Tahir<sup>1</sup>, Davide Tosi, Sandro Morasca  
Department of Theoretical and Applied Sciences, Università degli Studi dell'Insubria, Via Valleggio 1, 23100 Sesto San Giovanni, Italy

- Highlights
- We performed a systematic literature review on semantic web services.
  - Many proposed testing approaches involve traditional testing techniques.
  - The most popular transformation is into Petri Nets.
  - Testing challenges identified were mostly not solved.

Abstract

Semantic web services are gaining more attention. Therefore, testing semantic web services is becoming a key concern as an essential quality assurance measure. The objective of this systematic literature review is to summarize the current state of the art of functional testing of semantic web services by providing answers to a set of research questions. The review follows a predefined procedure that involves automatically searching 5 well-known digital libraries. After applying the selection criteria to the results, a total of 34 studies were identified as relevant. Required information was extracted from the studies and summarized. Our systematic literature review identified some approaches available for deriving test cases from the specifications of semantic web services. However, many of the approaches are either not validated or the validation done lacks credibility. We believe that a substantial amount of work remains to be done to improve the current state of research in the area of testing semantic web services.

ABSTRACT

Semantic web services are gaining more attention as an important element of the emerging semantic web. Therefore, testing semantic web services is becoming a key concern as an essential quality assurance measure. The objective of this systematic literature review is to summarize the current state of the art of functional testing of semantic web services by providing answers to a set of research questions. The review follows a predefined procedure that involves automatically searching 5 well-known digital libraries. After applying the selection criteria to the results, a total of 34 studies were identified as relevant. Required information was extracted from the studies and summarized. Our systematic literature review identified some approaches available for deriving test cases from the specifications of semantic web services. However, many of the approaches are either not validated or the validation done lacks credibility. We believe that a substantial amount of work remains to be done to improve the current state of research in the area of testing semantic web services.

# Thomson Reuters – Journal Citation Reports

11/18/2013

The screenshot shows a web browser window with the URL `admin-apps.webofknowledge.com/JCR/JCR`. The page title is "ISI Web of Knowledge<sup>SM</sup> Journal Citation Reports<sup>®</sup>". The navigation bar includes "WELCOME" and "HELP" buttons, and the text "2012 JCR Science Edition". The main heading is "Country/Territory Selection".

The interface contains two main sections:

- 1) Select one or more countries/territories from the list to filter journals.** Below this instruction is a link: [\(How to select more than one\)](#). To the right is a scrollable list of countries: PAKISTAN, PEOPLES R CHINA, PHILIPPINES, POLAND, PORTUGAL, REP OF GEORGIA, ROMANIA (highlighted in blue), RUSSIA, and SAUDI ARABIA.
- 2) Sort journals by:** A dropdown menu is set to "Journal Title".

A "SUBMIT" button is located below the sorting options.

At the bottom of the page, there is a footer with the Thomson Reuters logo and the text "Published by Thomson Reuters". Above the logo, there are links for [Acceptable Use Policy](#) and [Copyright © 2013 Thomson Reuters.](#)

# Thomson Reuters – Journal Citation Reports

11/18/2013

The screenshot shows the ISI Web of Knowledge interface for the Journal Citation Reports. The page title is "Journal Citation Reports" and it is for the "2012 JCR Science Edition". The journal being viewed is "Revista Romana de Materiale-Romanian Journal of Materials". A table displays key metrics for this journal, including Total Cites (85), Impact Factor (0.610), 5-Year Impact Factor (0.333), Immediacy Index (0.125), Citable Items (48), and Citing Half-life (8.6). Below the table are buttons for "CITED JOURNAL DATA", "CITING JOURNAL DATA", "IMPACT FACTOR TREND", and "RELATED JOURNALS". The "Journal Information" section provides details such as the full title, ISO and JCR abbreviations, ISSN (1583-3186), language (MULTI-LANGUAGE), country (ROMANIA), publisher (SERBAN SOLACOLU FOUNDATION), and publisher address. It also lists subject categories like "CONSTRUCTION & BUILDING TECHNOLOGY" and "MATERIALS SCIENCE, MULTIDISCIPLINARY". On the right, "Eigenfactor Metrics" are shown, including an Eigenfactor Score of 0.00016 and an Article Influence Score of 0.051. At the bottom, there is a "Journal Rank in Categories" section with a "JOURNAL RANKING" button.
